

Using a BigKeys keyboard with an Apple iPad

- Use an Apple "iPad Camera Connection Kit" to plug your BigKeys keyboard into your iPad.

The connection kit contains 2 pieces:

- one piece is a card reader - you won't be using this
 - the other piece has a USB port - this is the piece you'll use to connect your BigKeys keyboard to your iPad.
- Connect the USB port connection piece to your iPad, with the USB port facing away from your iPad.
 - Connect your BigKeys using the USB port on the connection piece.
 - A message box will appear on your iPad, stating "Cannot Use Device. The connected USB device is not supported." (This is because the iPad is expecting a camera!)
 - Tap "OK".

That's it! Your BigKeys keyboard is now live and ready to use with your iPad.
